

Zhangku 13 (AI Edition) · User Manual

掌酷十三張 AI 版 · 使用手冊 · English

I. Feature Overview

1. Supports the MuMu emulator only. Download: mumu.163.com (drag any APK straight into the emulator).
2. Supports one-tap auto-arrange and auto-play.
3. Supported table rules are shown below.

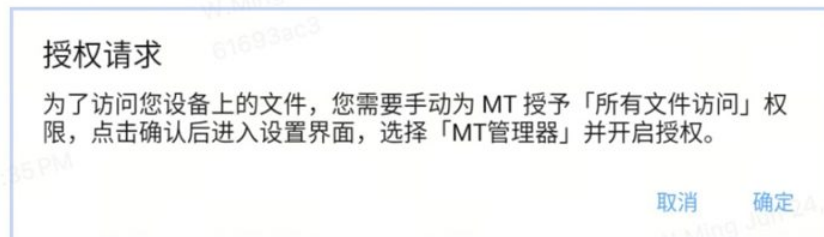

4. For special hands, arrange per the system suggestion and pause automation.
5. With automation off, only AI hints are shown.
6. Tap the AI hint box to close it.

II. Getting Your Login Credentials

2.1 Copy the credential files

1. Prepare a rooted Android phone; install WeChat, the official Zhangku 13 app, and MT File Manager.
2. Register / log in to the official app via WeChat and complete real-name verification.
3. Open MT File Manager, go to mt2.cn, and grant authorization.

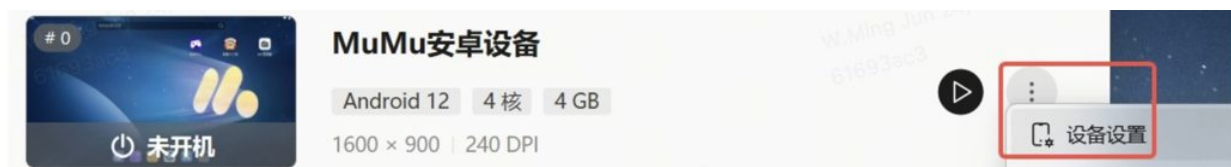

4. In the root path `/data/data/com.xmzk.zkssz/databases/`, copy the two credential files (`jsb.sqlite`, `jsb.sqlite-journal`).

5. On the emulator, install the Zhangku 13 AI edition and MT File Manager; sign in once with WeChat (it may fail, but do it once), then exit.

6. Enable root on the emulator too: three-dot menu → Device Settings → Developer Options → turn on Root.

7. Copy the two credential files from step 3 into the emulator' s
/data/data/com.xmzk.zkssz/databases/.
8. Open the Zhangku 13 AI edition — you can now log in.
9. Easy alternative: copy the credential files via Floating Window → Settings → Database → Import File.

2.2 Using the AI Edition

1. After logging into the AI edition, tap the shield floating-window at the top to sign in to your AI account.

2. Once signed in, tap the shield floating-window to open settings.

3. Both automation and delay are configurable; delay is the interval between arranging and confirming the play.

Settings: Automation (On), Token (High / Mid / Low), Delay (2–4 seconds), Database (Import File).
